What is
CuroQuip?

CuroQuip, is a SYSPRO dedicated add-on application.

CuroQuip focuses on managing equipment scheduling, tracking, and controlling tasks related to any type of self-owned, and/or customer owned equipment.
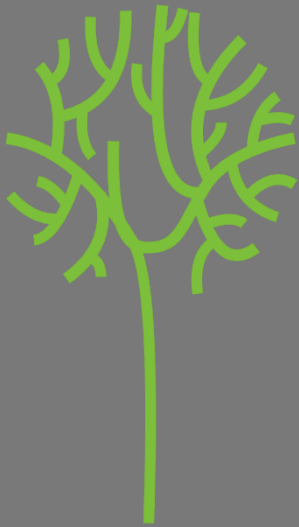

CuroQuip is built within SYSPRO and thus allows for direct transacting against Syspro data elements and processes.

CuroQuip utilises and interacts with the Syspro inventory and procurement processes and concepts without any integration being required.

SYSPRO™

ENABLE YOUR BUSINESS

CuroQuip

CuroQuip has the capability to manage Field Services, Internal Maintenance, Equipment Rentals, and Fleet Management

- Equipment Planning & Scheduling
- Equipment Tracking
- Workflow
- Quotes & Invoices
- Seamless ERP Integration
- Mobile & Web Capability
- Life Cycle Costing
- Reports and Dashboards

Equipment Planning & Scheduling

Adequate operational planning, preventative maintenance, and effective handling of breakdowns ensures equipment availability.

- Increased task efficiency
- Reduced stock outs
- Reduced maintenance costs
- Reduced breakdowns
- Increased life expectancy of Equipment

Equipment Tracking

Tracks fixed and moveable self-owned and/or customer owned equipment.

- Monitor physical equipment locations and movement
- Efficient and accurate equipment management
- Prevention of equipment loss

Workflow

A tool to define business processes that suits the way your business works.

- Segregation of duties
- Enforced business processes
- Improved work efficiency
- Automated communication with team members

Quotes & Invoicing

Quotes are generated using planned tasks. After the technician performed the task, the customer is invoiced with actual task details.

- Multiple tasks combined into one invoice
- Costs VS Sales analysis
- Warranty VS Invoiced analysis
- Automatic SLA tasks

Seamless ERP Integration

CuroQuip is built within and specifically for SYSPRO, which allows seamless ERP integration.
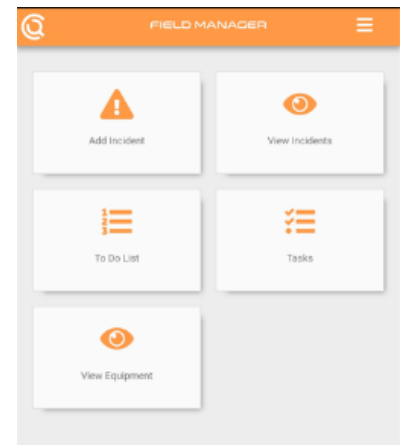

- **Standard SYSPRO modules used**
- **No duplication of data within different systems**

Mobile Capability

Complete mobile and web application for technicians and managers.

- **Decreased response time**
- **Reduced user errors**
- **Reduced paperwork**
- **Real time visibility**
- **Real time task sign-off**

Life Cycle Costing

Assist managers in assessing the ongoing use of equipment. Cost involved includes acquisition cost, operating cost, maintenance cost and disposal value.

- **Visibility on future resource requirements**
- **End of economic life identification**
- **Complete life cycle cost projection**
- **Make more informed decisions**

Reports and Dashboards

Visualisation of company data and information.

- **Identify KPI trends**
- **Companywide visibility**
- **Real time visualised**
